

Icaro Miranda Araujo de Lima Justino

[LinkedIn](#) | [+55 84 987926693](#) | icaromirandajustino@gmail.com | [GitHub](#)

Software Engineer with fullstack experience and specialization in QA, combining API development, web interfaces, and test automation in a single profile. Experience with modern stacks (NestJS, React, Spring Boot, Angular) and quality tools (Cypress, Playwright), with complementary training in test architecture.

Experience

Software Quality Engineer, CIn–Motorola Project

Recife, PE , Brazil 03/2025 - 04/2026

- Developed E2E tests for Android embedded systems in a continuous integration environment, covering critical mobile device functionality flows.
- Structured reusable test suites with layer separation, reducing code duplication and easing maintenance across continuous release cycles.
- Actively participated in Scrum ceremonies, contributing to acceptance criteria analysis, test strategy definition, and defect triage alongside the development team.

Software Developer, Logap Sistemas

Natal, RN, Brazil 09/2024 - 12/2024

- Implemented centralized LDAP authentication across multiple microservices using Spring Boot and .Net Core, eliminating the need for isolated per-application authentication.
- Developed analytical dashboards with Angular and Tailwind CSS consuming real-time data via GraphQL, with focus on visual clarity and rendering performance.
- Set up CI/CD pipelines with GitLab and Docker to automate build, testing, and deployment in an AWS environment, reducing manual interventions in the delivery process.
- Automated multi-platform tests using Cypress and Playwright, ensuring coverage of critical flows across developed tools.

Data Analysis Internship, CAERN

Natal, RN, Brazil 04/2024 - 09/2024

- Developed APIs with FastAPI and Pandas to consolidate data from multiple heterogeneous sources into a unified access layer, enabling analyses previously done manually.
- Created operational dashboards in PowerBI, Grafana, and Metabase integrated directly with the database, replacing periodic manual reports with real-time visualizations.
- Modeled views and stored procedures in PostgreSQL to organize data from multiple sources into filtered, analytics-ready views.

Software Development Internship, P2b.tech

Natal, RN, Brazil 03/2023 - 03/2024

- Developed and maintained RESTful APIs with NestJS and Express following a layered architecture (MVC), structuring communication between microservices across different client projects in a decoupled and standardized way.
- Built interfaces for multiple client projects with Next.js (Server and Client Components), converting Figma prototypes into code using Material UI and Ant Design, with attention to visual consistency and user experience.
- Developed custom WordPress solutions for clients, creating layouts and widgets with Elementor and integrating external platforms via GuzzleHTTP, extending the CMS beyond its native capabilities to meet specific project requirements.

Education

Federal Institute of Rio Grande do Norte (IFRN)

Natal, RN, Brazil 12/2024

- Associate Degree in Systems Analysis and Development

CIn - Center for Informatics, UFPE

Recife, PE, Brazil 04/2025

- Postgraduate Degree in Software Quality, with focus on test automation and architecture

Certifications

EF SET Certificate - C1 Advanced English - Apr/2026

- cert.efset.org/FM8qRY

Projects

MipsCode (04/2023 – 06/2024) — Web IDE for MIPS Assembly

Educational web IDE for MIPS assembly developed as a team using NestJS, Svelte, and React. The main technical challenge was implementing the MIPS instruction set interpreter and parser from scratch, enabling compilation and execution of low-level code directly in the browser without any native tool dependencies.
